- Como iniciar a construção de um AFD?
 - $L = \{bd^n a | n > 0\}$

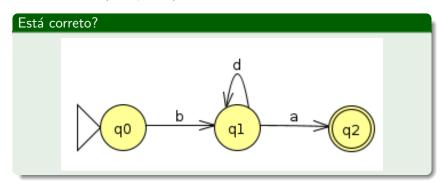

•
$$L = \{bd^n a | n > 0\}$$

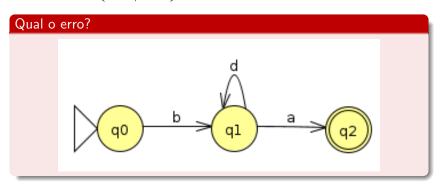

- Como iniciar a construção de um AFD?
 - $L = \{bd^n a | n > 0\}$

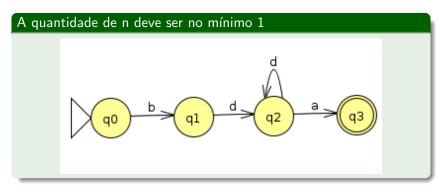

•
$$L = \{bd^n a | n > 0\}$$

- Como iniciar a construção de um AFD?
 - $L = \{bd^n a | n > 0\}$

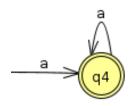

•
$$L = \{bd^n a | n > 0\}$$

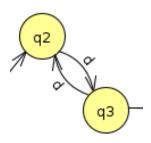

• L =
$$\{xd^{2n}a^m|n>0, m>0\}$$

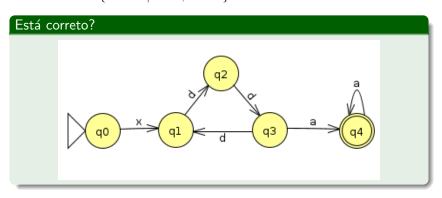

• L =
$$\{xd^{2n}a^m|n>0, m>0\}$$

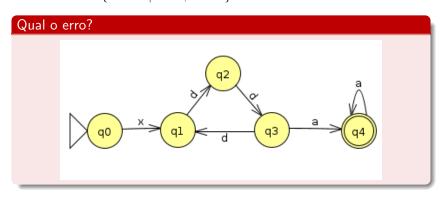

• L =
$$\{xd^{2n}a^m|n>0, m>0\}$$

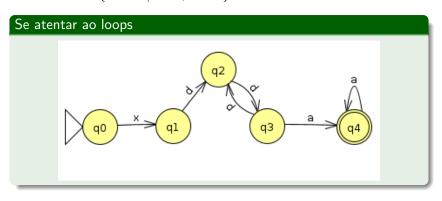

- Como iniciar a construção de um AFD?
 - L = $\{xd^{2n}a^m|n>0, m>0\}$

- Como iniciar a construção de um AFD?
 - L = $\{xd^{2n}a^m|n>0, m>0\}$

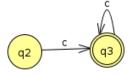

- Como iniciar a construção de um AFD?
 - L = $\{xd^{2n}a^m|n>0, m>0\}$

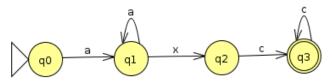

- Complete o AFD para a linguagem:
 - $L = \{a^n x c^m | n > 0, m > 0\}$

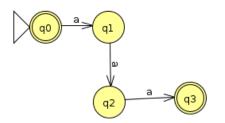

- Complete o AFD para a linguagem:
 - $L = \{a^n x c^m | n > 0, m > 0\}$

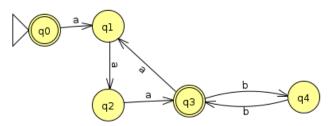

- Complete o AFD para a linguagem:
 - L = $\{a^{3n}b^{2m}|n \ge 0, m \ge 0\}$

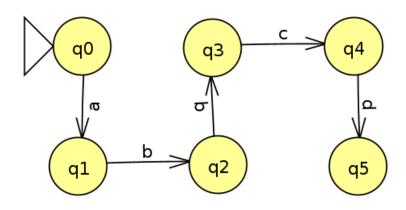

- Complete o AFD para a linguagem:
 - L = $\{a^{3n}b^{2m}|n \ge 0, m \ge 0\}$

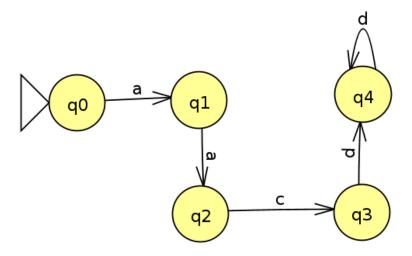

- L = {abbcd}
- $L = \{aacd^n | n > 0\}$
- L = $\{a^nbc^m|n>0, m>0\}$
- L = $\{d^{2n}c^mab|n>0, m>0\}$

 $\bullet \ L = \{abbcd\}$

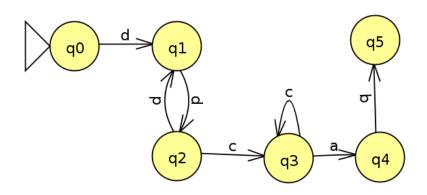

• $L = \{aacd^n | n > 0\}$

• L = $\{a^nbc^m|n>0, m>0\}$

• L = $\{d^{2n}c^mab|n>0, m>0\}$

Obrigado! Dúvidas?
